

Helping People Help The Land

Conservation Planning

There's no time like the present. There's no better reason than the future.

Having a conservation plan today is one way to prepare for tomorrow. The professionals at your local Natural Resources Conservation Service (NRCS) or Soil and Water Conservation District (SWCD) office can provide free assistance to help you develop or refine your conservation strategy. We'll help you craft a conservation plan that meets the unique needs of your operation, your land, and your life.

Provided below is an overview of some most commonly plan practice in Mississippi:

Most Commonly Planned Conservation Practices

- *Practice 342 (Critical Area Planting)*
- *Practice 382 (fence)*
- *Practice 410 (Grade Stabilization Structure)*
- *Practice 561 (Heavy Use Area Protection)*
- *Practice 612 (Tree/Shrub Establishment)*
- *Practice 614 (Watering Facility)*
- *Practice 315 (Herbaceous Weed Control)*
- *Practice 378 (Pond)*
- *Practice 449 (Irrigation Water Management)*
- *Practice 587 (Structure for Water Control)*
